Summary

PHP developer with a year and a half of commercial experience. I build online stores and websites end to end, from the database to the interface: plain PHP 7.4 / 8.2 and Laravel, MySQL and PostgreSQL, JavaScript and Vue. I work with Docker and Git and follow SOLID, KISS and DRY. Looking for a PHP or fullstack developer role: remote, on-site or with relocation.

Back end: PHP 7.4 / 8.2 (OOP, plain PHP), Laravel 11–12, REST API, Composer

CMS: WordPress, WooCommerce, 1C-Bitrix

Front end: JavaScript, AJAX, Vue, Angular (basic), HTML5, CSS3 / SASS, jQuery, Bootstrap, responsive layout

Databases: MySQL, PostgreSQL

Testing and quality: PHPUnit, PHPStan, Vitest

Infrastructure: Docker, Git, Linux, VPS

Principles: SOLID, KISS, DRY, MVC, MVP, MVVM

Also: C# (ASP.NET Core MVC), Java (Android), Python, Firebase

Professional experience

Company	**Siberix LLC (Russia, remote)**
Period	09.2025 — 05.2026 (9 months)
Role	PHP Developer (Junior+, fullstack)
Project	Web studio: online stores and marketplaces, business card websites and landing pages, web services and web applications, CMS websites and UX/UI design for clients. I owned my projects from start to delivery, working with a team lead, a front-end developer and an SEO specialist.
Responsibilities and achievements	**Back end** • Product catalogues in plain PHP: filtering, sorting, pagination. • Cart and checkout, order notifications by email. • Request and contact forms with server-side validation and spam protection. • Admin panels for managing products, orders and content. • Extending Laravel 11–12 projects: routes, controllers, Eloquent models, migrations, Blade templates. • REST endpoints for the front end: AJAX filters and product loading. • WordPress and WooCommerce: theme customisation, hooks and shortcodes, store setup. **Databases** • Designing MySQL and PostgreSQL tables for products, categories, orders and users. • SQL queries with JOINs, grouping and aggregation; indexes to speed up catalogue queries. • Schema changes through Laravel migrations. **Front end** • Responsive page layout from mockups. • Catalogue pagination and filters without page reloads, wired to the server side. • Sliders and carousels, CSS and JavaScript animations. • Extending Vue and Angular components. **Quality** • Tests for my code with PHPUnit and Vitest, code checks with PHPStan. • Git (branches, merge requests), Docker for the local environment. **Achievements:** Delivered 5+ client projects on my own, building both the server side and the interface.
Technologies	PHP 7.4 / 8.2, Laravel 11–12, WordPress, WooCommerce, MySQL, PostgreSQL, JavaScript, Vue, Angular, PHPUnit, PHPStan, Vitest, Docker, Git

Company	**Freelance (remote)**
Period	07.2024 — 03.2025 (9 months)
Role	Web Developer
Project	WordPress and plain PHP websites and a Python Telegram bot for clients.
Responsibilities and achievements	**Tasks** • dari-radost.by: a gift ideas catalogue on WooCommerce with search, partner sections and a blog.

	• mirno.by: a mediation service website with a specialist directory, articles and a callback request form. • Theme and plugin setup, building missing blocks in Elementor, mobile-friendly layout. • Contact Form 7 forms with reCAPTCHA, Yandex Metrica, hosting and domain setup. • Landing pages in plain PHP, JavaScript, HTML and CSS with up-to-date product prices: an admin panel for prices and content, Yandex Metrica. • An online store in plain PHP without a CMS at the client's request: product catalogue, user profile, reviews, admin panel. • A Python Telegram bot for requests and sales: taking requests, mailings to users, a current topics section, user questions. **Achievements:** Delivered 6+ projects to clients: websites, an online store and a Telegram bot. dari-radost.by and mirno.by are still live.
Technologies	WordPress, WooCommerce, Elementor, PHP, JavaScript, HTML, CSS, MySQL, Python, Telegram Bot API, Git, Docker

Education

2026	**Mogilev State Polytechnic College** Software Development and Maintenance for Information Systems
2025	**Sotbit, PHP developer internship** Plain PHP and OOP, MySQL, 1C-Bitrix, Git
2025	**Skillbox** Course "PHP Developer from Zero to PRO"
2023	**IT STEP Computer Academy** Web development
