SUMMARY

Fullstack developer, building software since 2021, with about a year of commercial experience. I create websites, mobile and desktop applications, and chatbots. I deliver projects end to end on my own: database design, back end, user interface and deployment to shared hosting or a VPS. I work with C#, Python, PHP, Java and JavaScript, as well as Firebase and Cloudflare. Completed an internship at Sotbit, built commercial websites for clients and taught web development at IT STEP Computer Academy. Open to job offers and collaboration.

SKILLS

Back end: C# (ASP.NET Core MVC, Entity Framework Core), Python (Django, FastAPI), PHP (plain PHP, Bitrix Framework, Laravel — basic), Java

Front end: HTML5, CSS3 / SASS, JavaScript, jQuery, Bootstrap 4/5, responsive layout, Vue.js (basic)

CMS: WordPress, 1C-Bitrix, Magento (basic)

Mobile: Android (Java), Android Jetpack, MVVM, Firebase SDK

Desktop and automation: C# (Windows Forms), Delphi (task automation), 1C:Enterprise

Chatbots: Python, Telegram Bot API, Discord, VK API and other platforms

Databases: MySQL, PostgreSQL, Cloud Firestore, Firebase Realtime Database

Cloud and infrastructure: Cloudflare Workers / R2 / KV, Firebase (Authentication, Hosting), Cloudinary, Linux, VPS, Docker, Nginx

Tools and APIs: Git, Leaflet, OpenStreetMap, OSRM, Nominatim, OpenRouter (LLM), Playwright

PROJECTS

Traces — a guide to memorial sites of Belarus (graduation project) · traces-ffd5c.web.app

Website and Android app in Java. Built single-handedly.

- 102 sites, 7 of them with 3D models. Interactive map (Leaflet, OpenStreetMap), search, interface in three languages: Belarusian, Russian and English.
- An AI guide answers questions and builds routes across a city or region from the project's sites. Powered by Cloudflare Workers and OpenRouter.
- Trip planner: saved routes, day-by-day plans, stop order optimisation, road routing (OSRM), nearby restaurants and hotels, sharing a route by link. Sign-up, reviews and ratings.
- Admin panel: dashboard, content page and home page management, user moderation, APK uploads to Cloudflare R2.
- Stack: Firebase Authentication, Cloud Firestore, Firebase Hosting, Cloudflare Workers / R2 / KV, osmdroid in the mobile app.

BelarusHeritage — a website about the cultural heritage of Belarus · GitHub

- ASP.NET Core 8 MVC, Entity Framework Core, MySQL (32 tables), jQuery, Bootstrap, Leaflet and MapLibre.
- Heritage catalogue, interactive map, timeline, quizzes, road route builder, Belarusian ornament builder.
- Detailed admin panel with an audit log and a recycle bin, admin and user roles, interface in three languages.

Commercial websites · dari-radost.by · mirno.by

- **Dari Radost** — a gift ideas catalogue with search, partner sections and a blog (WordPress, WooCommerce, Elementor).
- **Mirno.by** — a mediation service website: practice areas, specialist directory, articles, callback requests (WordPress).

Android apps (Java, Firebase) · github.com/TheFulum

- **Time2Help** — a volunteering platform: events, applications, QR check-in, calendar with reminders, chats, web admin panel.
- **My City** — an app for Mogilev residents: issue reports with photos and geotags, news from RSS feeds, public transport routes, residents' posts and chats.
- **Poligram** — a messenger with photos, videos, documents and voice messages. **OwnTest** — creating and taking tests with manual answer review. **FamilyHelper** — a family task planner.

Other projects

- **WholesaleShop** — an online store with wholesale pricing, orders, pickup points and Excel reports (ASP.NET Core MVC, MySQL).
- **Chart of accounts trainer** for an accounting teacher: 124 questions, timer, answer review, question editor via the GitHub API.
- PHP chat and Excel parser (Sotbit internship). Site Cloner — a command-line tool for offline copies of websites, including WebGL (TypeScript, Playwright).
- Python chatbots for Telegram, Discord and VK. Personal VPN server on a VPS (Linux, 3X-UI).

EXPERIENCE

PHP Developer Intern, Sotbit (May — September 2025)

- Completed a programme in PHP, Git, 1C-Bitrix (Bitrix Framework) and front-end development (HTML, CSS, JavaScript, DOM, OOP).

- Built a chat in plain PHP (custom model layer, user accounts, file sharing) and an Excel file parser that stores products in MySQL; improved and optimised the chat after delivery.
- Integrated a ready-made design into 1C-Bitrix and deployed the project to a local server.

Freelance: commercial development (February 2024 — March 2025)

- Websites for clients built with WordPress and PHP + JavaScript, including dari-radost.by and mirno.by: layout, CMS and plugin setup, deployment to hosting.
- Applications built to client specifications: 11 Delphi desktop programs with databases (accounting, stores, doctor appointments, real estate), an admin panel in C# (Windows Forms, MySQL), web applications in ASP.NET Core MVC (online store, catering service).

Programming Instructor, IT STEP Computer Academy (January — April 2024)

- Taught HTML, CSS and JavaScript classes, reviewed practical assignments and checked students' work.

EDUCATION

Mogilev State Polytechnic College 2023–2026

Major: Software Development and Maintenance for Information Systems

IT STEP Computer Academy 2021–2023

Web development, OOP (Java), algorithms, MySQL, client-server applications. Certificate awarded.

Skillbox courses: PHP Developer, Git and Team Development, Linux.

LANGUAGES

Russian: native

English: technical: fluent reading of documentation and professional articles, good listening comprehension, basic speaking

Polish: conversational
